# EUROPEAN WINDOW TECHNOLOGY OFFERS SOLUTIONS THAT ARE ONE STEP AHEAD OF TIME

**Tilt Mode**

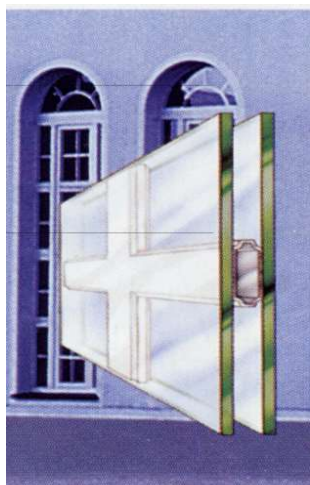

**Swing Mode**

German high-tech engineering, excellent craftsmanship and experience in building superior quality windows and doors for more than 40 years.

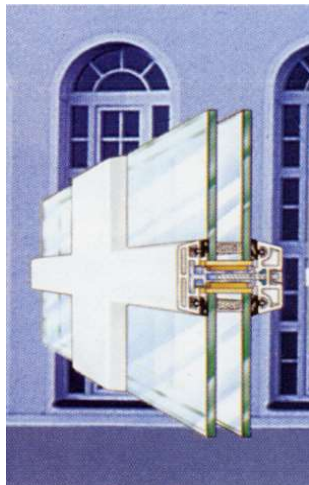

**HEINZMANN®** windows and doors are made of solid vinyl and are operated with a single handle. By turning the handle, you can operate the window in two separate modes: the turn mode (swing mode) for easy cleaning, and the tilt mode (inward mode) for ventilation.

**HEINZMANN®** windows and doors exceed the highest industrial standards, making them ideal for residential and commercial buildings.

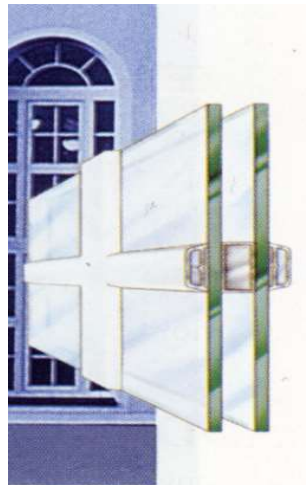

**Custom Made • High Performance • Maximum Energy Efficiency  
Superior Design • Security & Safety • Reduces Outside Noise Levels**

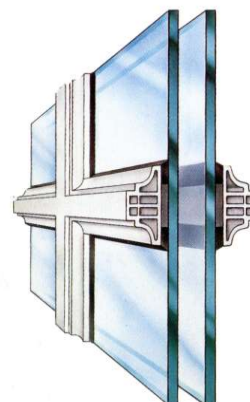

**GRID BETWEEN GLASS**

**TRUE DIVIDED**

**SIMILAR DIVIDED**

**ANALLARY PROFILE**

# RENOVATION

# HURRICANE SHUTTERS AND ROLLER SHUTTERS

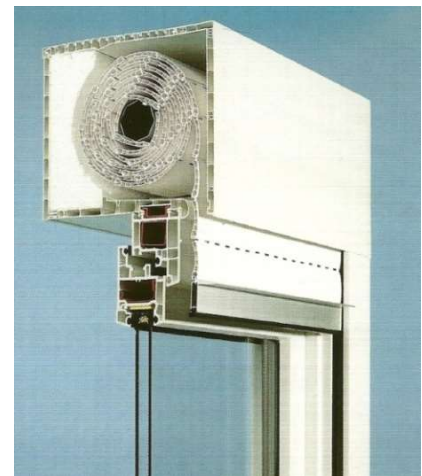

Today, roller shutters are the most practical way to secure residential and commercial buildings. In addition, a roller shutter can be installed to any existing window and door. More and more homeowners are discovering the benefits a roller shutter has to offer. Fully rolled down, a shutter not only protects against natural disasters, but protects against burglars and intruders, lowers energy cost, reduces outside noise levels and gives greater privacy.

Made from Aluminum or PVC, the shutter rides in tracks, mounted on the side of the window or door. The shutter can be raised or lowered either manually, by pull strap, gear crank, or electrically.

For new construction it is recommended that the roller shutter be installed in combination with the window or door, so that the roller shutter box will not extend to the outside.

Custom fitted screen panel, retractable screens and screen doors are available.

## A NAME THAT STANDS FOR QUALITY – OVER 40 YEARS OF EXPERIENCE

1970 Karlheinz Heinzmann, the founder of HEINZMANN®, began producing and distributing roller shutters and accessories out of a former wine cellar in Kitzingen, West Germany.

1972 Production of the first HEINZMANN® roller shutter profiles.

1979 Construction was completed on the first HEINZMANN® production plant, located in the industrial area in Kitzingen. The full scale production of vinyl windows and doors began.

1990 HEINZMANN® opened a production plant located in Oehna, East Germany and began exporting to Eastern Europe.

1995 HEINZMANN® certified under DIN EN ISO 9001 and was awarded the DEKRA - Seal.

1998 HEINZMANN® began exporting to the USA.

**Since 1970, the range of products and the number of employees have grown at an enormous rate. With more than 120 employees HEINZMANN® remains a family owned and operated business.**

**HEINZMANN® windows and doors are custom made and carry a limited lifetime warranty\* against factory defects regardless of**

**STYLE, SIZE,  & TURN or FIXED**

## **ENERGY EFFICIENCY**

When cutting energy cost and protecting your most valuable investment is important, you are now looking at the right windows and doors. HEINZMANN® windows and doors provide maximum energy efficiency, security, safety and reduce outside noise levels. HEINZMANN® windows and doors are made from absolute weather proof and age resistant materials.

## **MORE SECURITY FOR YOUR HOME**

Burglary statistics are alarmingly high and windows and doors are the favorite point of entry into the house in 80% of all cases. Prying out the frame is the method used by most criminals.

HEINZMANN'S rigid construction, heavy hardware with multi locking points and secure installation make entry almost impossible. Intruder resistant hardware is used in all of HEINZMANN® products.

\*Against any manufacturing defects! This warranty does not apply to broken or scratched glass, hardware, roller shutters, screens!
